

I believe Sinclair Broadcasting's move to clearly influence the election by airing the "documentary" produced by the The Swift Boat Veterans for Truth is an attack on our democratic process. This type of ideological programming whether it is on the left or right, is more harmful to our country than any terrorist attack.

By labeling this film as "news" and not commentary or editorial, Sinclair Broadcasting abuses the American public. The continued consolidation of media corporations which in turn act in a manner as Sinclair Broadcasting intends to act, can only hurt the public whom the media outlets are supposed to serve.

Because of Sinclair's actions in this partisan manner, I urge the FCC to condemn the actions of The Sinclair Broadcasting Company and to take a new stance to the consolidation of media outlets.

Thank you,

Roger Beck
